

Windows Server Prepare Question

Module 1

1. What are AD DS components?
2. What is the AD DS schema?
3. What is an AD DS forest?
4. What is an AD DS domain?
5. What is new in AD DS in Windows Server 2016?
6. What are OUs?
7. What is Azure AD?
8. What is a domain controller?
9. What is a global catalog?

Module 2

10. What is user account?
11. What is group account?
12. What is computer account?
13. What are user account attributes?
14. What are user account templates?
15. What are Distribution groups?
16. What are Security groups?
17. What is Local groups?
18. What is Domain-local groups?
19. What is Global groups?
20. What is Universal groups?
21. What are the Special Identities groups?
22. What is the computers container?
23. What is Organizational Unit (OU)?
24. How to use Windows PowerShell cmdlets to create user accounts AD?
25. How to use Windows PowerShell cmdlets to create group accounts AD?
26. How to use Windows PowerShell cmdlets to create computer accounts AD?
27. How to use Windows PowerShell cmdlets to create OUs?
28. How to use Windows PowerShell cmdlets to delete user accounts?
29. How to use Windows PowerShell cmdlets to delete group accounts?
30. How to use Windows PowerShell cmdlets to delete computer accounts?
31. How to use Windows PowerShell cmdlets to delete OUs?
32. What is Windows PowerShell?
33. What are bulk operations?
34. What are the considerations for using OUs?

Module 3 - Local Storage

35. What is local storage in Windows Server?
36. What is the difference between local storage and shared storage?
37. What types of local storage are supported in Windows Server?
38. How can you view available disks in Windows Server?
39. What is the purpose of Disk Management in Windows Server?
40. What is the difference between a basic disk and a dynamic disk?
41. What file systems are commonly used on Windows Server?
42. What are the advantages of NTFS over FAT32?
43. How do you initialize a new disk in Windows Server?
44. What is a storage pool in Windows Server?
45. What is Storage Spaces, and how does it work?
46. What are the different resiliency types available in Storage Spaces?
47. How do you extend a volume in Windows Server?
48. What is disk fragmentation, and how can it be managed?
49. How do you check disk health on a Windows Server?
50. What is the difference between MBR and GPT partition styles?
51. Which volume type provides fault tolerance by maintaining an identical copy of data on another disk?
 - A. Spanned
 - B. Striped
 - C. Mirrored
 - D. Basic
52. Which volume type combines free space from multiple disks into a single logical volume without fault tolerance?
 - A. RAID 5
 - B. Spanned
 - C. Mirrored
 - D. RAID 1
53. What is another name for a Striped Volume?
 - A. RAID 1
 - B. RAID 5
 - C. RAID 0
 - D. RAID 10
54. Which RAID level requires a minimum of three disks?
 - A. RAID 0
 - B. RAID 1
 - C. RAID 5
 - D. Basic Disk
55. If one disk fails in a RAID 0 array, what happens?
 - A. Data remains available
 - B. Data is rebuilt automatically
 - C. Entire volume is lost
 - D. Only parity data is lost

- 56. What is the difference between a Basic Disk and a Dynamic Disk?
- 57. Explain how a Spanned Volume works.
- 58. What are the advantages and disadvantages of a Mirrored Volume?
- 59. Why is RAID 0 faster than RAID 1?
- 60. What is the purpose of parity in RAID 5?
- 61. Which volume type would you recommend for maximum performance?
- 62. Which volume type would you recommend for fault tolerance?
- 63. What happens when a disk in a Spanned Volume fails?
- 64. What is the minimum number of disks required for RAID 5?
- 65. How much usable space is available in a RAID 1 configuration with two 1TB disks?

Module 4 - Permissions

- 66. What is the difference between Share Permissions and NTFS Permissions?
- 67. What are the default share permissions when a folder is shared?
- 68. What are the three basic Share Permissions?
- 69. What permissions are included in Full Control?
- 70. What is the difference between Read and Change permissions?
- 71. What are NTFS permissions?
- 72. Name the standard NTFS permissions available in Windows Server.
- 73. Which permission allows a user to change file content but not ownership?
- 74. When both Share and NTFS permissions are applied, which permission takes precedence?
- 75. A user has Full Control on Share Permissions and Read on NTFS. What is the effective permission?
- 76. A user has Read on Share Permissions and Modify on NTFS. What is the effective permission?
- 77. What is the difference between Modify and Full Control?
- 78. What is permission inheritance?
- 79. How can you disable inheritance on a folder?
- 80. What are explicit permissions and inherited permissions?
- 81. What is the purpose of the Everyone group?
- 82. Module 5 - Group Policy
- 83. What is Group Policy?
- 84. What are the Benefits of using Group Policy?
- 85. What is configuration management?
- 86. What are starter GPOs?
- 87. What are Group Policy Objects?
- 88. What is GPO scope?
- 89. What is GPO inheritance?
- 90. What is Local GPOs?
- 91. What is Site-level GPOs?
- 92. What is Domain-level GPOs?

- 93. What is OU GPOs, including any nested OUs?
- 94. What are GPO links?
- 95. What are Group Policy WMI filters?
- 96. What is RSOP?
